COMPANY OVERVIEW

Company Snapshot

Africardo Construction & Civils is a Windhoek-based construction and civils company supporting homeowners, property developers, businesses, institutions, government/municipal clients, and infrastructure-related work across Namibia.

The company helps clients move from drawings, BOQs, tender documents, site requirements, renovation ideas, or urgent maintenance needs into organised work on site.

Africardo's role is to understand the scope, assess site conditions, plan the work, coordinate resources, supervise execution, and help clients move toward a dependable handover.

COMPANY STORY

Built for practical delivery, not vague promises.

Africardo Construction & Civils exists for clients who need building work, civil support, renovations, finishes, and project coordination to move from paper into controlled site execution.

Operating since its inception in 2013, Africardo has grown around practical delivery: reviewing the scope, understanding what the site requires, and keeping construction decisions tied to what can be delivered.

The company focuses on understanding the scope, reading the conditions around the site, organising labour and resources, supervising the work sequence, and keeping the client informed enough to make confident decisions.

Clear scope, visible site control, practical sequencing, and handover readiness guide the way Africardo approaches every project.

CLIENT GROUPS

Who We Serve

Different clients need different levels of certainty, documentation, speed, and site communication.

01

HOMEOWNERS

New homes, upgrades, kitchens, bathrooms, repairs, and finishing work.

02

PROPERTY DEVELOPERS

Building packages, site works, external works, and handover support.

03

CORPORATE CLIENTS

Office changes, maintenance, fit-out, partitions, aluminium, and practical upgrades.

04

INSTITUTIONS

Controlled construction work where documentation, access, and sequencing matter.

05

GOVERNMENT & MUNICIPAL CLIENTS

Practical building and civil works support aligned to scope and procurement requirements.

06

CIVIL WORKS & INFRASTRUCTURE CLIENTS

Reticulation, earthworks, drainage, paving, kerbing, and concrete-related packages.

DIRECTION

Vision, Mission & Values

VISION

To become a trusted Namibian construction and civils partner known for site discipline, credible delivery, and durable results.

MISSION

To help clients turn drawings, scope, and site requirements into organised work that is supervised, sequenced, and ready for handover.

TRUST POINTS

Why Clients Choose Africardo

01

SCOPE REVIEW

Drawings, BOQs, site notes, timing, and client priorities are checked before mobilisation.

02

SITE PLANNING

Labour, materials, plant needs, access, inspections, and sequence are considered together.

03

HANDS-ON SUPERVISION

Work packages are followed on site so quality, safety, and timing remain visible.

04

RESPONSIVE COMMUNICATION

Clients receive direct discussion around progress, risk, missing information, and next steps.

05

QUALITY WORKMANSHIP

Structure, services, joinery, aluminium, paint, and handover details are treated as one delivery chain.

06

SAFE WORK PRACTICES

Work is approached with site awareness, basic controls, PPE expectations, and access awareness.

07

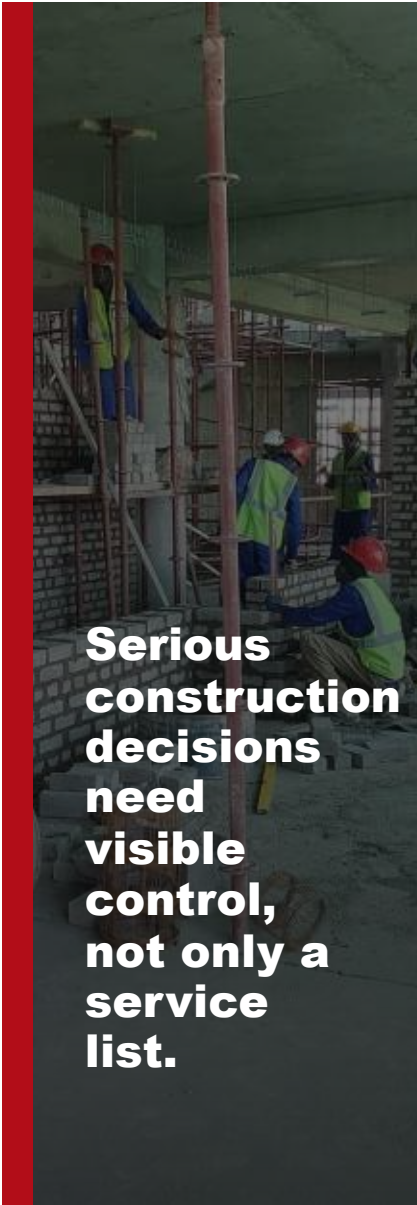

COST AWARENESS

Scope choices, quantities, materials, programme needs, and project constraints are considered before pricing.

08

FLEXIBLE DELIVERY CAPACITY

Africardo can coordinate building, finishing, civils, maintenance, and selected partner-supported works.

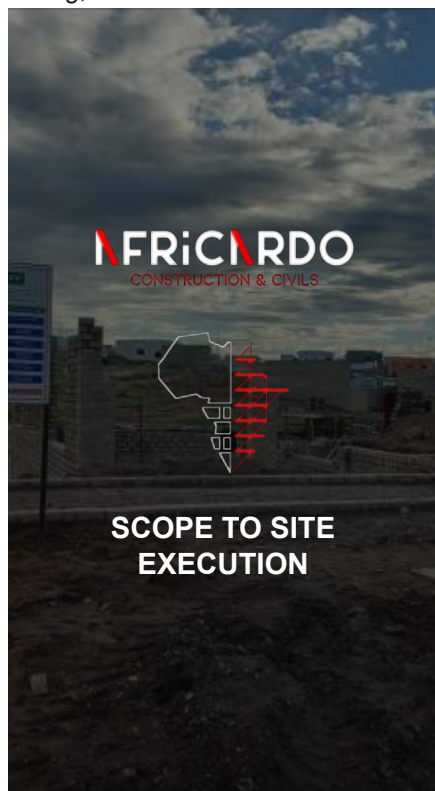

Serious construction decisions need visible control, not only a service list.

SERVICES MAP

Core Services Overview

One team for the work packages clients most often need before, during, and after site execution.

BUILDING CONSTRUCTION

Residential, commercial, institutional, and selected public-sector building projects.

RENOVATIONS & REMODELLING

Homes, offices, repairs, maintenance, kitchens, bathrooms, and improvements.

CIVIL WORKS & INFRASTRUCTURE SUPPORT

Water and sewer reticulation, earthworks, drainage, paving, kerbing, site clearing, retaining, and concrete works.

PROJECT COORDINATION & TENDER SUPPORT

Drawings review, BOQ review, site visits, sequencing, procurement planning, and quotation support.

JOINERY & INTERIOR FIT-OUT

Kitchen cupboards, built-in cupboards, counters, storage, office partitions, and interiors.

ALUMINIUM WINDOWS & DOORS

Windows, doors, replacements, installation support, and upgrades.

MAINTENANCE & UPGRADES

Property maintenance, facility repairs, minor building works, external works, paving, and renovation support.

HOMES & RENOVATIONS

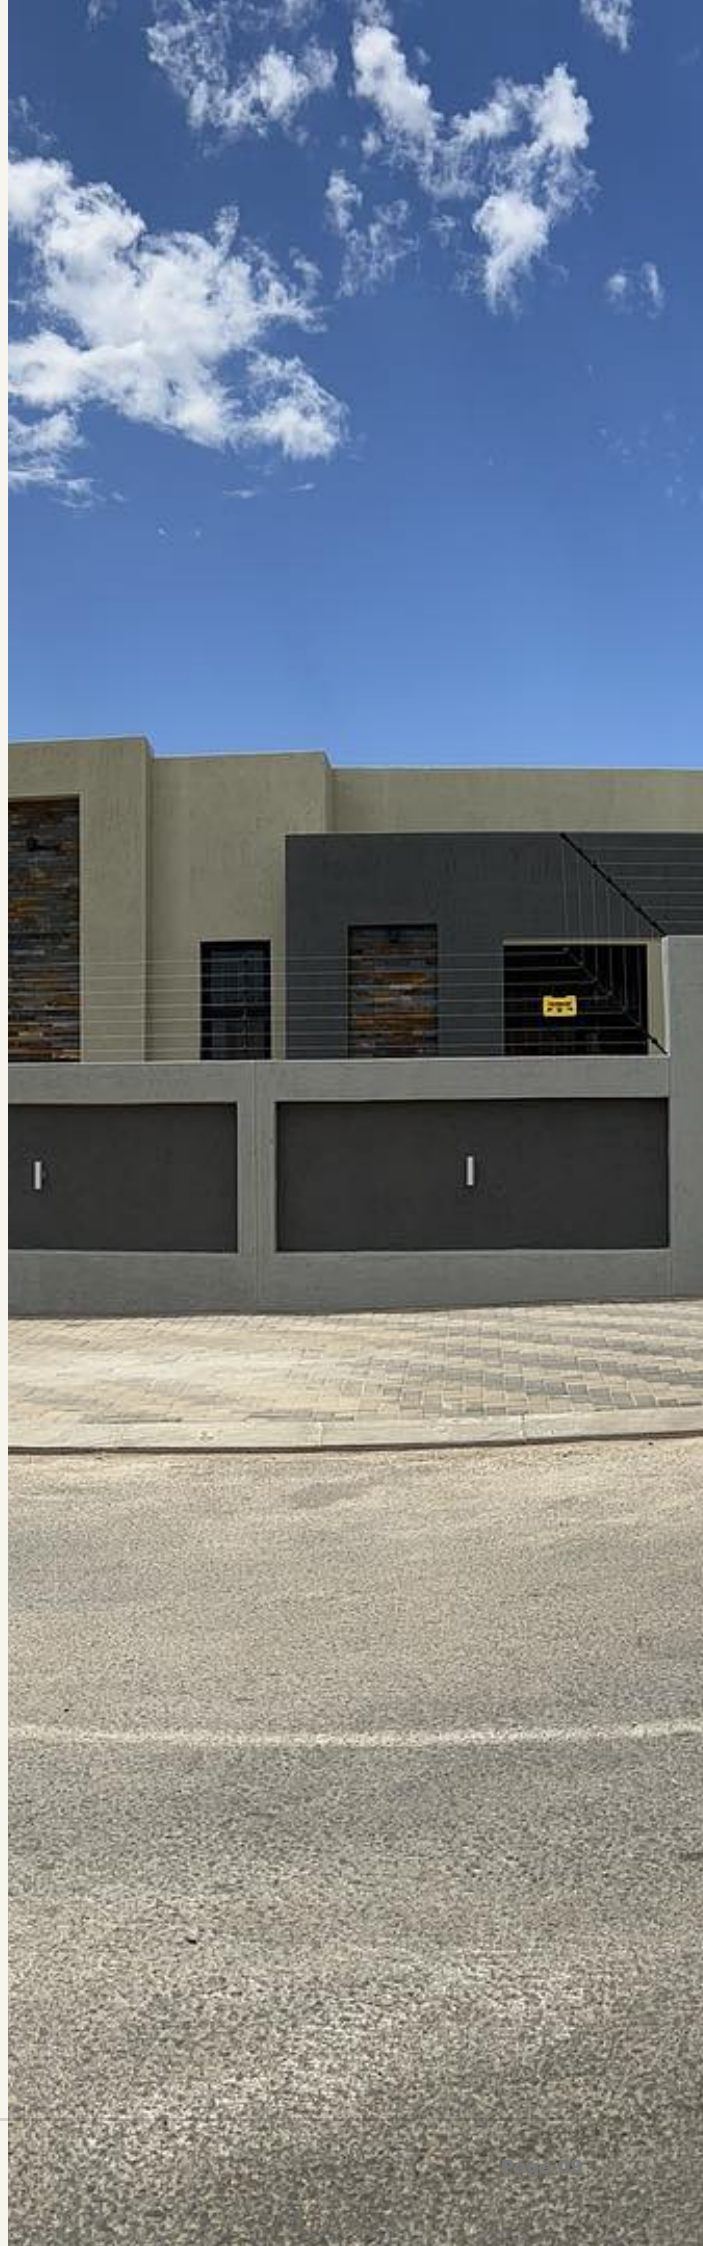

Residential Construction & Renovations

Africardo supports homeowners and developers with residential building, upgrades, maintenance, finishes, and handover-focused work that must be practical, clean, and coordinated.

Home projects need clear conversation, realistic sequencing, and workmanship that respects the property while moving steadily toward a finished, usable space.

TYPICAL SCOPE

- New residential construction
- Renovations and remodelling
- Kitchens, bathrooms, cupboards, and interiors
- External works, paving, repairs, and maintenance
- Handover finishing and defect attention

CORPORATE & INSTITUTIONAL

Commercial & Institutional Works

Practical construction and maintenance support for spaces that must stay usable, organised, and accountable.

BUSINESS SPACES

Office renovations, partitions, counters, warehouses, commercial buildings, maintenance, and interior improvements.

INSTITUTIONS

Schools, classrooms, halls, clinics, healthcare upgrades, flats, apartments, and work requiring controlled access.

PUBLIC-SECTOR SUPPORT

Building and civil works support aligned to defined scopes, quotation requirements, documentation, and practical delivery constraints.

PROGRAMME**ACCESS****SAFETY****HANDOVER**

CAREFUL CAPABILITY WORDING

Civil Works & Infrastructure Support

Capabilities are shown clearly so clients understand what Africardo can deliver directly and what may require partners or hired plant.

CAN DELIVER NOW

- Water reticulation
- Sewer reticulation
- Earthworks
- Drainage / stormwater
- Paving / kerbing
- Site clearing / preparation
- Retaining / concrete works

WITH PARTNERS / HIRED PLANT

- Gravel road construction
- Road re-graveling
- Bituminous surface roads

Civil works capacity is shown with clear delivery boundaries and partner-supported work identified separately.

**FINISHING WORKS**

Joinery, Aluminium & Interior Fit-Out

Final spaces need workmanship, coordination, measurements, protection of finished surfaces, and a clean handover.

- Kitchen cupboards and built-in cupboards
- Counters, storage, and office partitions
- Aluminium windows, doors, replacements, and upgrades
- Interior improvements and coordinated finishing packages

BEFORE SITE WORK STARTS

Project Coordination & Tender Support

Africardo can help clients understand what is missing, what must be priced, and what needs to be sequenced before work starts.

01

CLIENT SUBMITS PROJECT INFORMATION

Drawings, BOQs, photos, tender documents, deadline notes, or site requirements.

02

AFRICARDO REVIEWS THE SCOPE

Check quantities, missing information, site constraints, access, and delivery risk.

03

SITE VISIT, WHERE REQUIRED

Confirm conditions, measurements, access, sequencing, and site-specific questions.

04

QUOTATION OR TENDER PREPARATION

Prepare quote inputs, methodology notes, programme thinking, and partner or plant requirements.

05

CLIENT DISCUSSION

Discuss assumptions, missing items, options, timing, and practical next steps.

06

SITE EXECUTION

Coordinate resources, supervise work, communicate progress, and work toward handover.

**WHAT
AFRICARDO
CAN REVIEW**

Drawings, BOQs, tender documents, scope notes, site photos/videos, measurements, and site address/location pin.

Africardo aims to respond to project enquiries within 1-2 business days, depending on project size, information provided, and site visit requirements.

PROOF OF WORK

Project Portfolio / Proof of Work

Completed work, active site progress, civils work, and finishing details help clients understand practical capability.

COMPLETED RESIDENTIAL HOME

ASSURANCE

Health, Safety, Environment & Compliance

Every project needs practical controls that protect workers, clients, neighbours, and the finished work.

SITE PLANNING

Plan access, sequence, materials, and work areas before activity begins.

PPE AWARENESS

Promote practical PPE expectations for people working on active sites.

SUPERVISION

Keep visible site control, communication, and progress checks in place.

HOUSEKEEPING

Manage debris, tools, storage, dust, and work areas throughout the project.

RISK AWARENESS

Identify site-specific hazards, access issues, and public interface risks.

CLIENT AND PUBLIC PROTECTION

Protect occupants, visitors, neighbours, and finished work where applicable.

ENVIRONMENTAL RESPONSIBILITY

Waste handling, housekeeping, dust and noise awareness, and careful use of the site are built into project planning.

COMPLIANCE AWARENESS

Where required, Africardo can provide relevant documentation subject to availability, project requirements, and management approval.
